

# LOGO ART SPECIFICATIONS

Imprint Method	Black & White	Color	Shading
Laser Engraving	✓	X	X
Sandblasting	✓	X	X
Sublimation	✓	✓	✓

## VECTOR FILES

**BEST RESULTS FOR ALL**

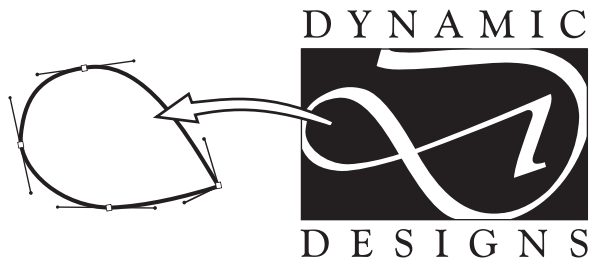

Vector files are distinguishable as they have no pixelation to them and when the logo is clicked on, numerous lines will appear within the logo. If a box opens up around your logo, the format is most likely not vector line art.

## RASTER FILES

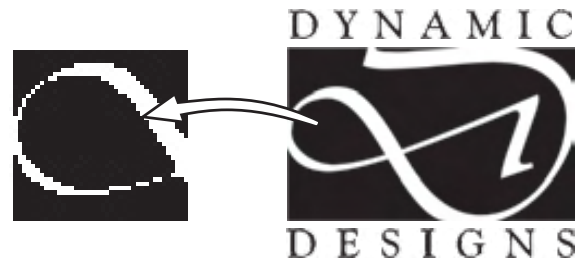

**SUBLIMATION ONLY**

Raster files are only accepted for sublimation as they are made up of dots per inch and will result in jagged lines when enlarged. Rasterized logos without too much detail can be converted for a \$25 fee and will take **up to 24 hours** to create.
